

X-Ray, Gamma Ray and MeV Radiography

Stasuk Testing provides a wide array of radiographic services. Whether it be small diameter piping welds or massive storage tanks, our mobile darkrooms and field service technicians are experienced. We are the only full service NDT company to offer full thickness capabilities from as thin as 1/16" aluminum up to heavy 16" thick Steels. We hold radiography procedures to CSA, AWS, API, ASME and Aircraft Standards.

Providing Full Digital or Conventional Radiography Services:

- 
- Laboratory X-Ray from 80keV – 300keV
 - Field X-Ray from 120keV – 300keV
 - Lab and Field Iridium 192 Gamma
 - Lab and Field Cobalt 60 Gamma
 - Lab high MeV for heavy steels
 - Short Run Pipe ID Pig X-Ray
 - Light and Heavy Castings
 - Pressure Vessels
 - Boiler Tube
 - Tie-In Pipeline
 - Mainline Pipeline
 - Gas Line
 - Structural Steel
 - Storage Tanks
 - Aircraft
 - Marine Vessels
 - Heavy Concrete
 - Shadow Shots
